

★ Actual progress was a bit slow on the start due to the research taking time and figuring out the best way to go about it however we were ahead of the schedule on the 3<sup>rd</sup> and 4<sup>th</sup> day due to the review and search feature being complete. However in the last <sup>expected</sup> day we were unable to meet the progress due to team member being sick.

We had been doing better then the last day in terms

last sprint until the last day of the sprint  
of previous speed velocity.
